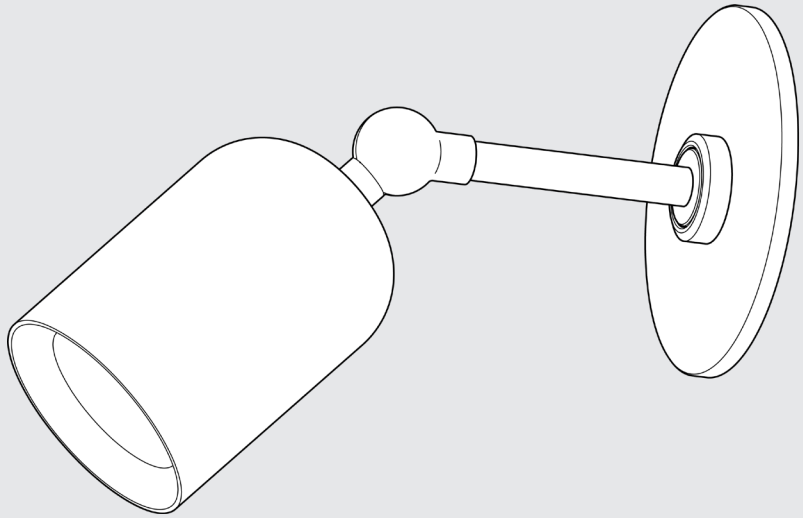
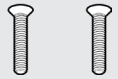
Inspect Contents



Fixture



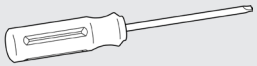
2x Machine Screw

Terminology

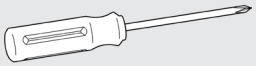
Lock Ring

Backplate

Fixture Socket

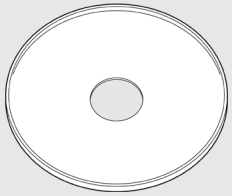


Flathead Screwdriver
(Not Included)



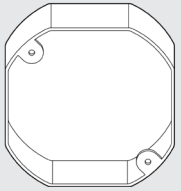
Phillips Screwdriver
(Not Included)

Adapter



Canopy

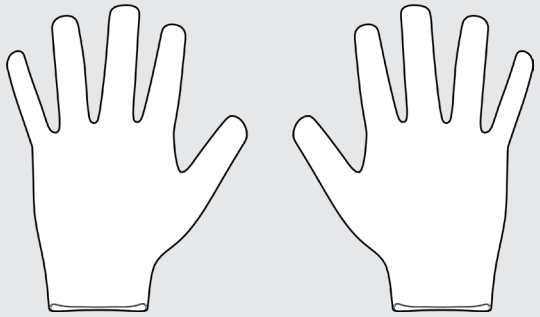
Ball Swivel



Junction Box
(Not Included)

3

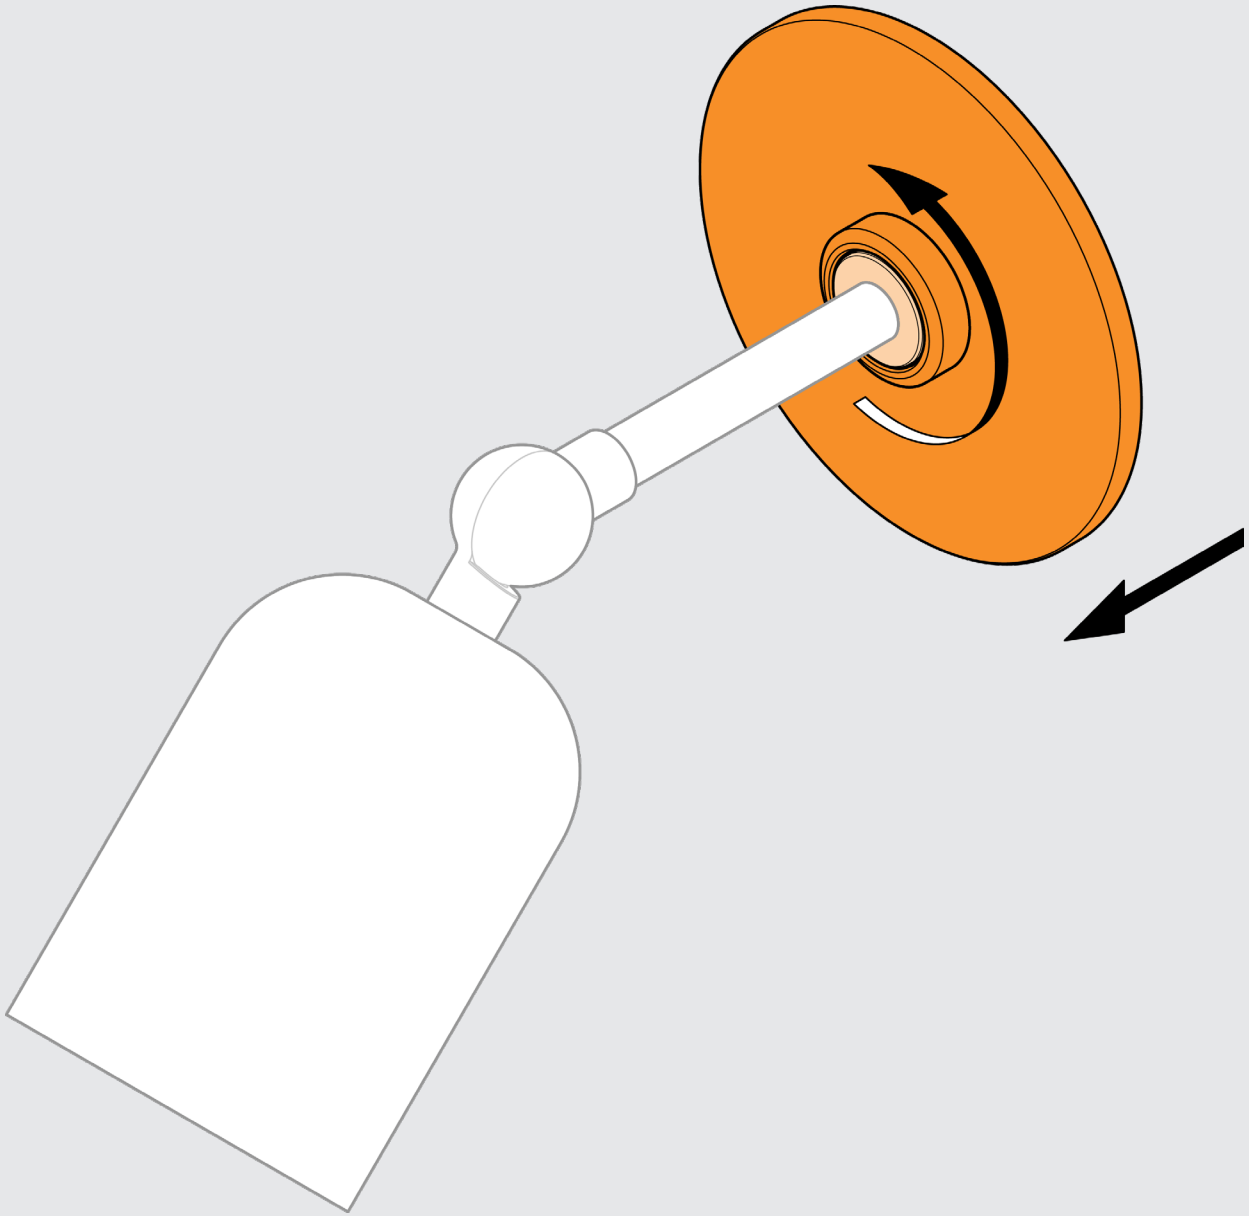
Preparation



Nitrile Gloves

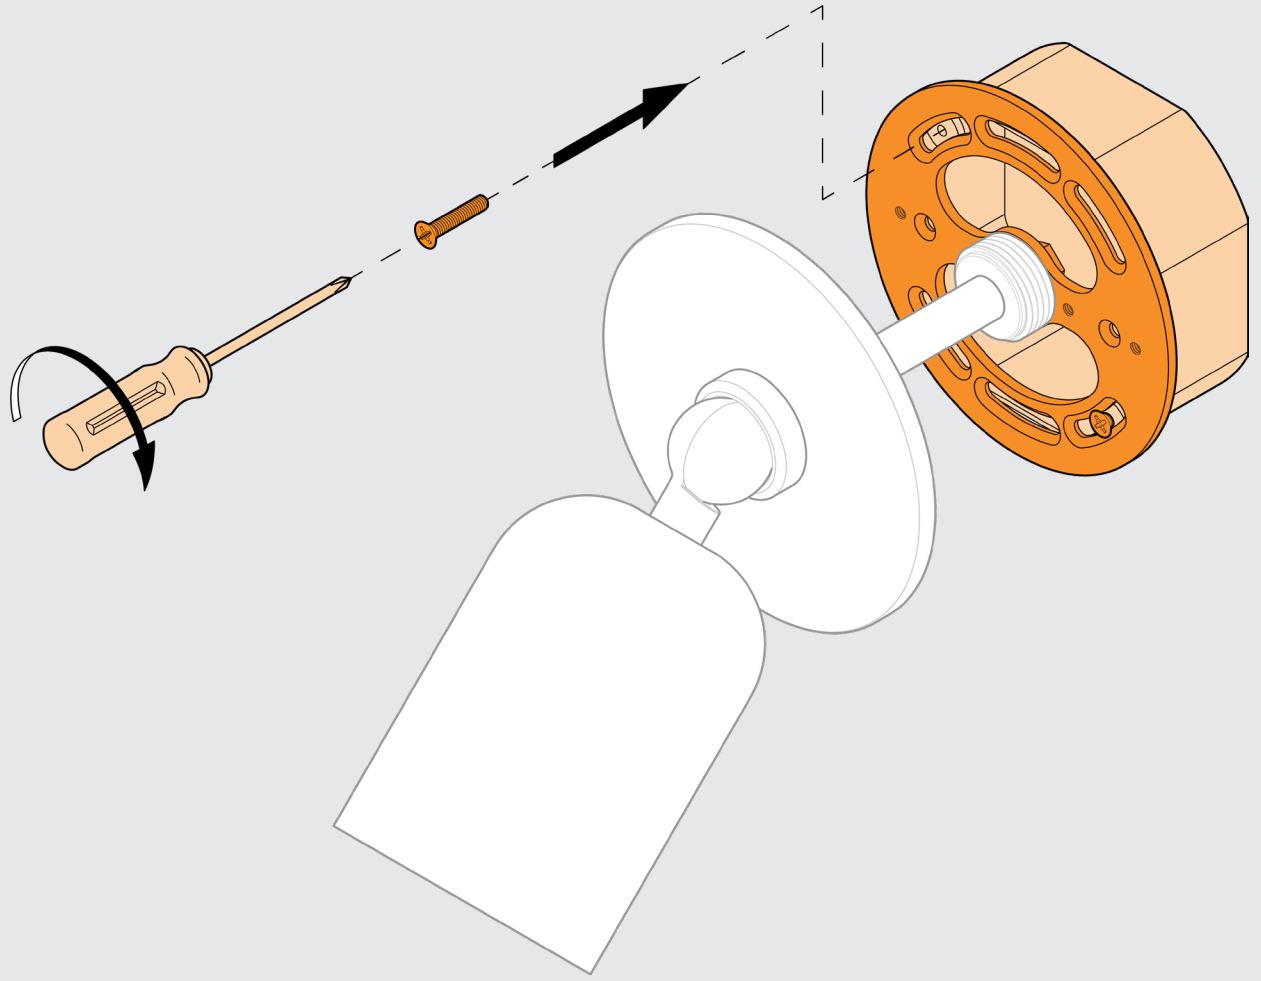
4

Unscrew and remove the lock ring from the adapter. Then, remove the canopy.



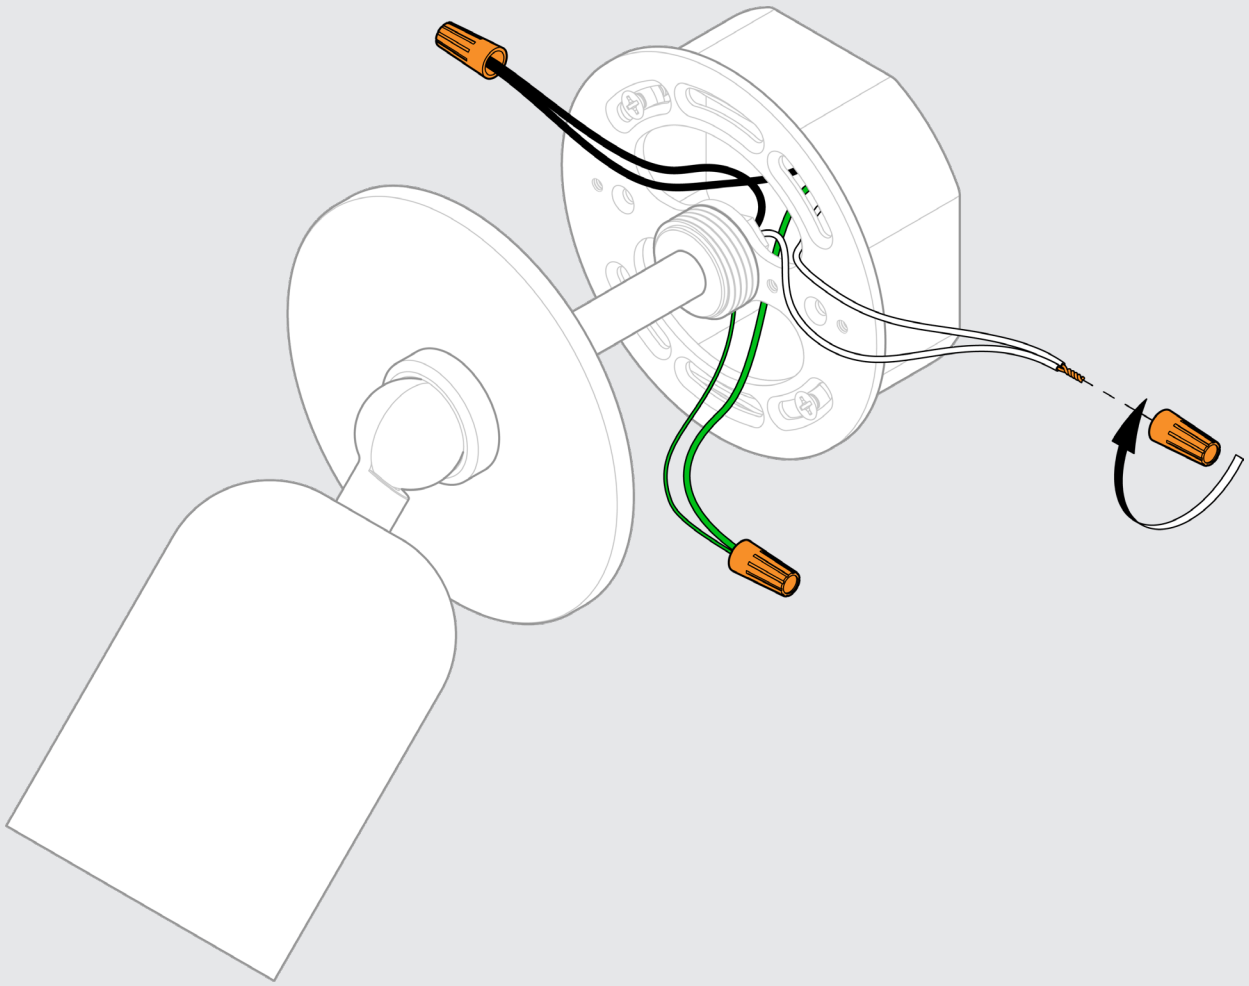
5

Mount the backplate onto the junction box using the provided machine screws.



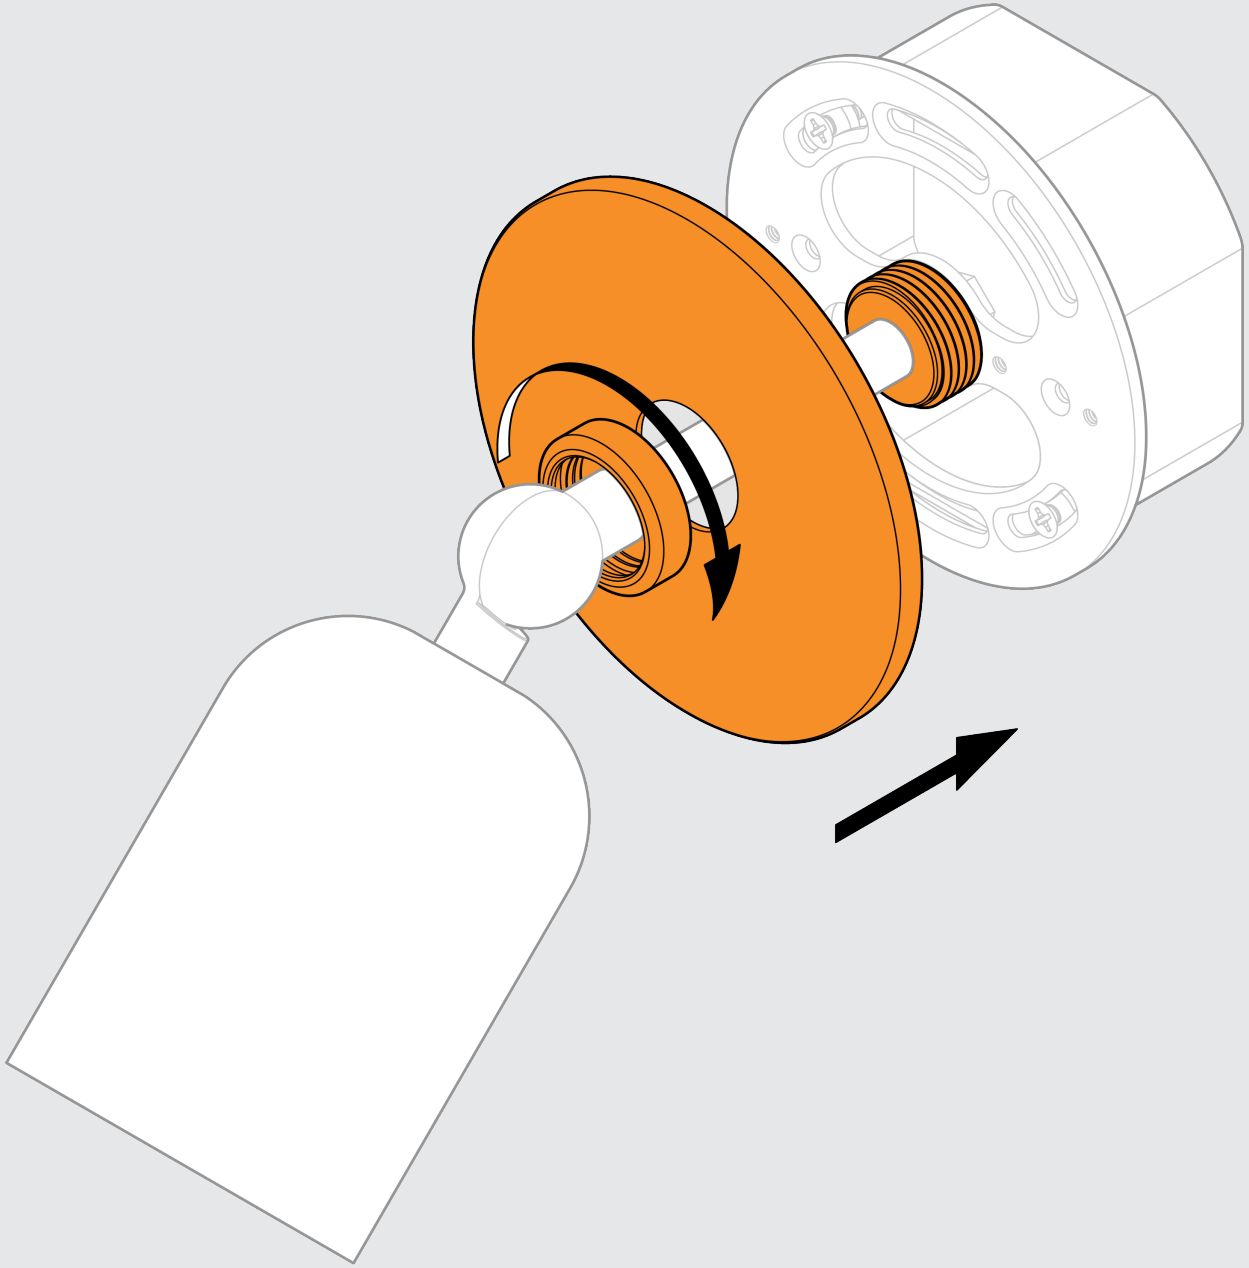
6

Connect the ground wires. Then, connect the wires from the fixture to the wires from the junction box using wire nuts.



7

Carry the canopy back over the adapter and then screw the lock ring back onto the adapter to secure the canopy into place.



8

Loosen and tighten the screw on the ball swivel to adjust the fixture shade accordingly.

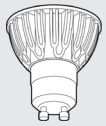
Fixture Socket

Lock Ring

Glass

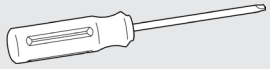
1/16 Hex Key
(Not Included)



Light Bulb

Adapter
&
4x Set Screw

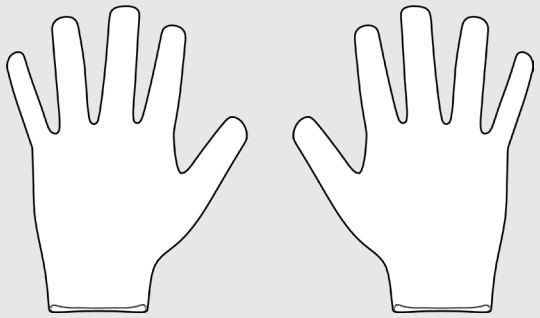
O-Ring



Flathead Screwdriver
(Not Included)

2

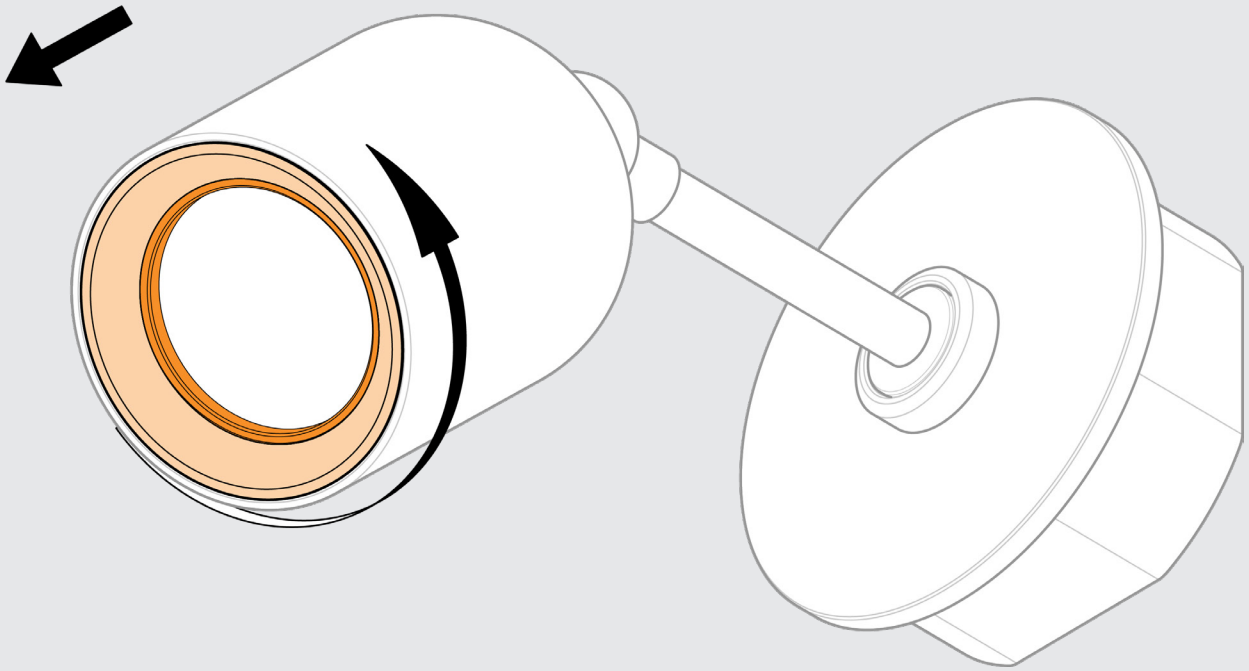
Preparation



Nitrile Gloves

3

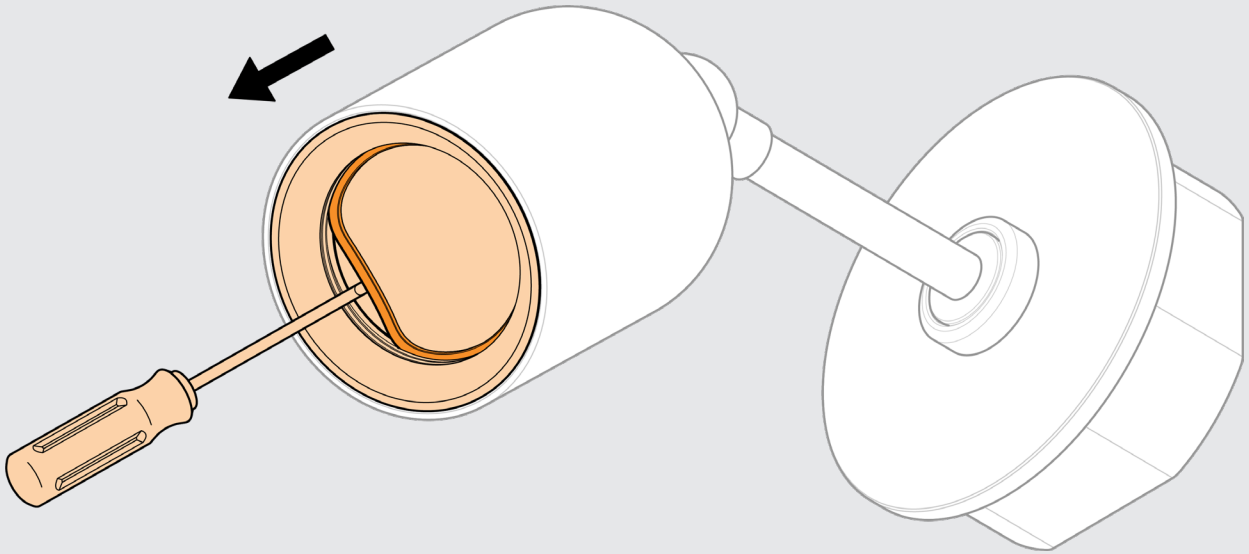
Unscrew the lock ring from the adapter.



4

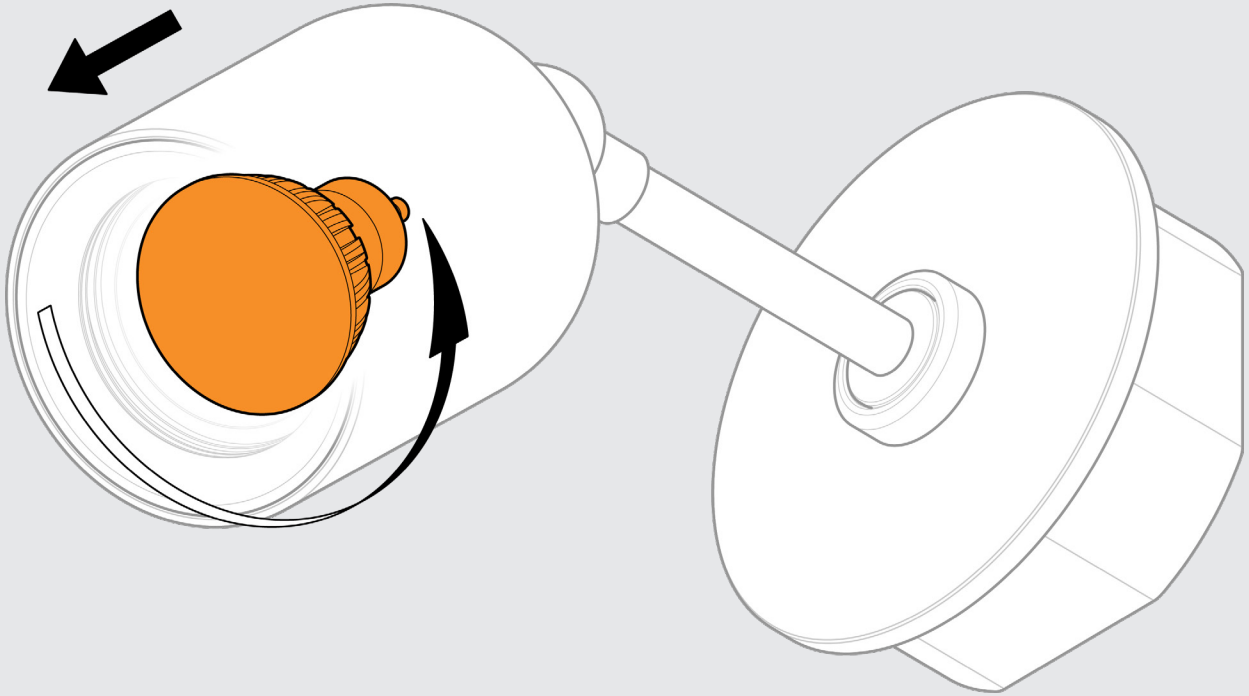
Using a flathead screwdriver, carefully remove the O-Ring from the adapter. Then, remove the glass.

CAUTION: Carefully remove the O-Ring to prevent damage to the glass and metal finish. The glass is held loose and will fall out once the O-Ring is removed.



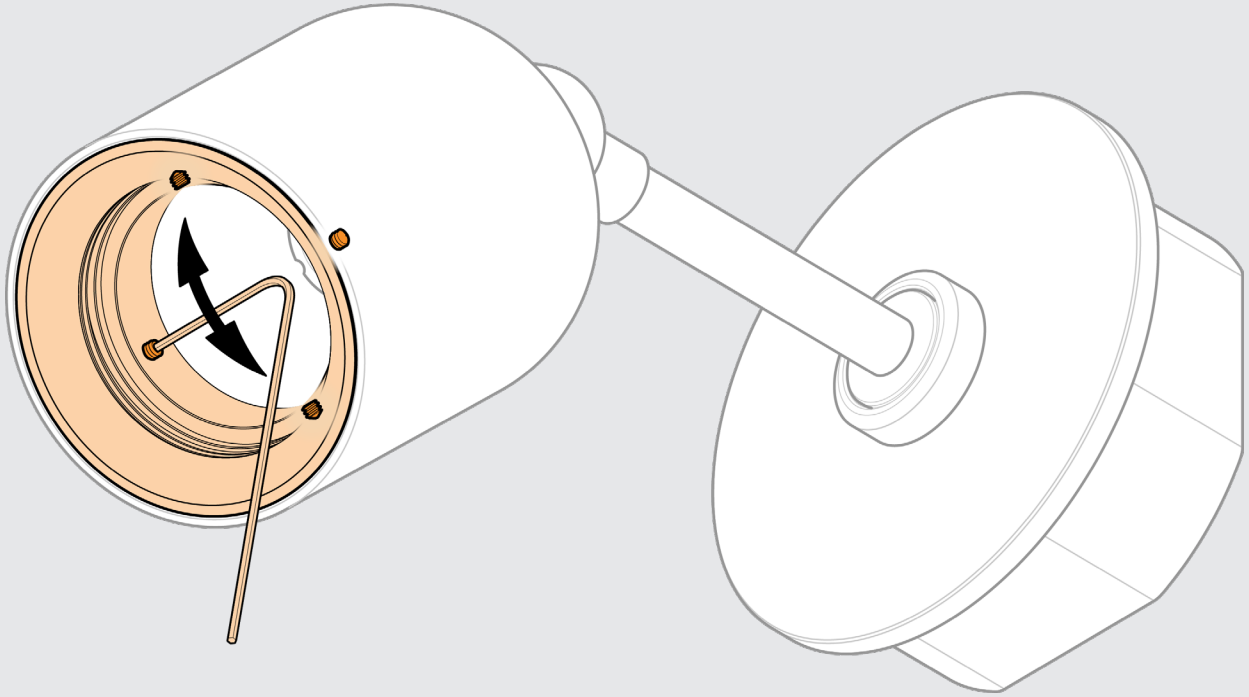
5

Unscrew and remove the light bulb.



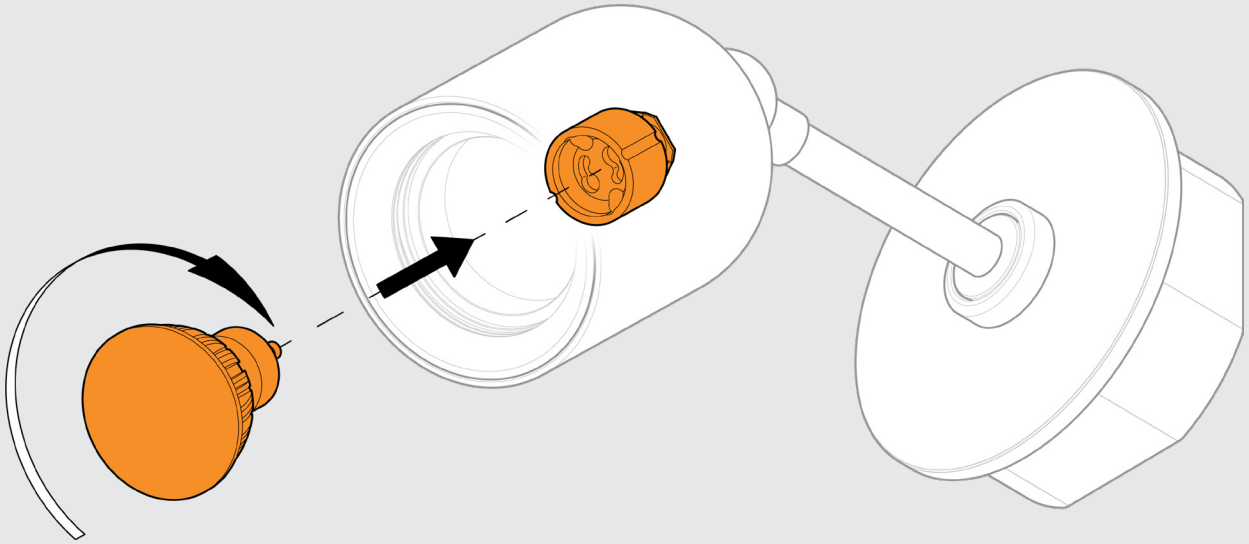
6

Using a 1/16 hex key, check the four set screws to ensure that they are fully tightened.



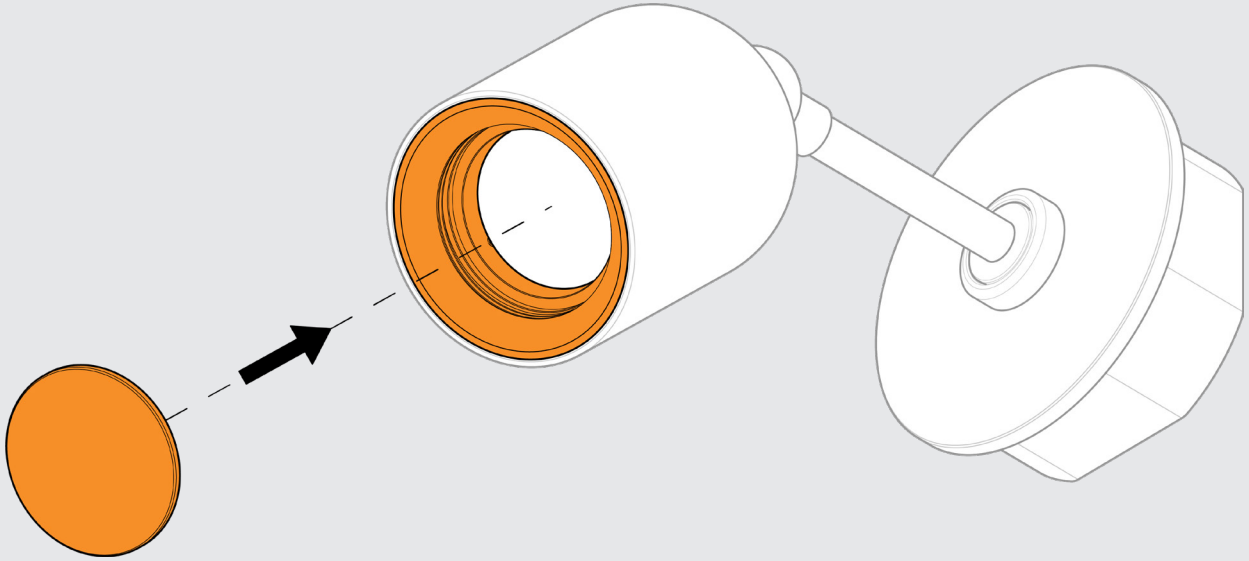
7

Screw the replacement light bulb into the fixture socket.



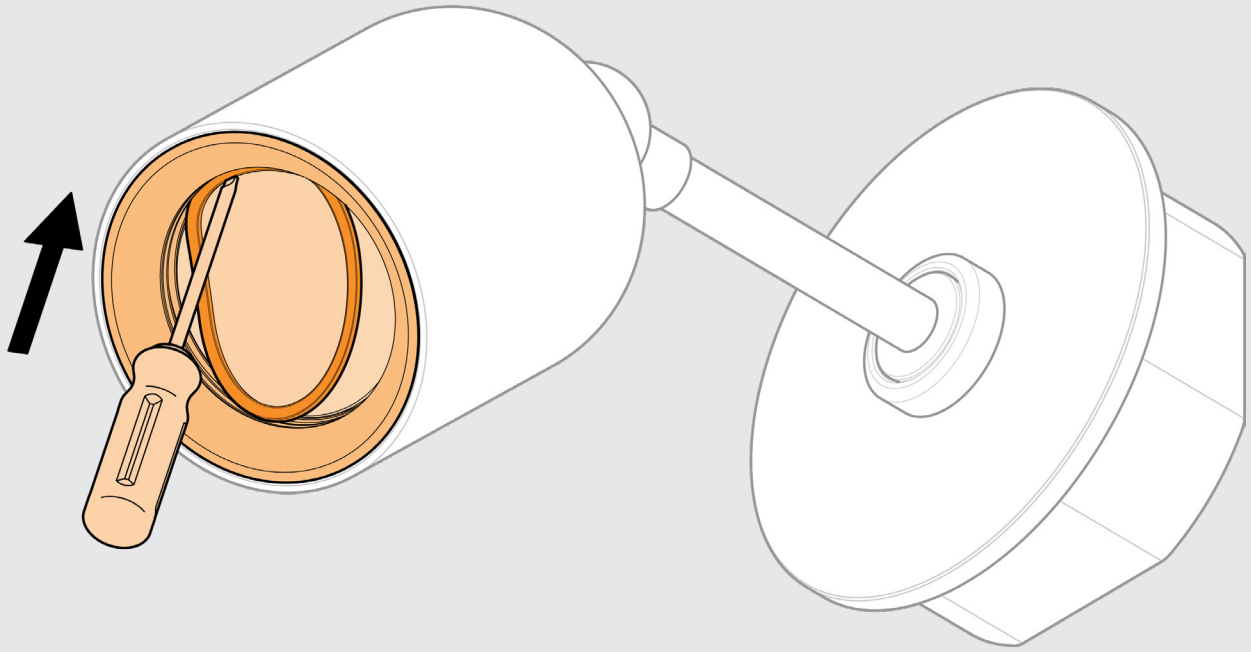
8

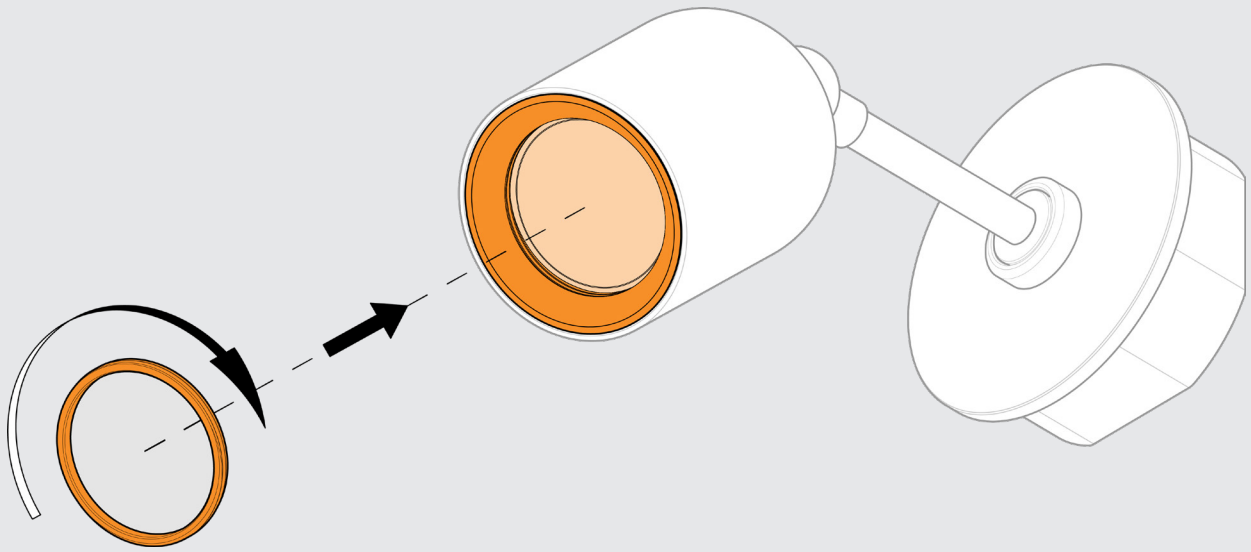
Place the glass over the adapter and hold in place.



9

Using a flathead screwdriver, reinsert the O-Ring into the inner channel of the adapter.
CAUTION: Carefully insert the O-Ring to prevent damage to the glass and metal finish.



10


Screw the lock ring back onto the adapter to secure the O-Ring and glass into place.
